## **SISGRASS HYBRID TECHNOLOGY FOR THE CRICKET MARKET**

For athletes to perform at their best, they need the best cricket surfaces to play on.

We're constantly innovating, and have made it our goal to engineer the most advanced cricket surfaces on the market, adapting our award-winning **SISGrass** technology to the needs of the sport.

### **THE BENEFITS:**

Our award-winning hybrid grass technology is designed to improve your natural grass cricket surface, for a more durable surface.

- ▶ Improved surface durability and profile stability
- ▶ Helps to create and maintain a consistent playing surface
- ▶ Reduced wear helps to maintain a greater grass coverage
- ▶ Reduces bowler foot holes and crease damage
- ▶ Reduces repair works after play
- ▶ Faster grass recovery time and extended hours of play
- ▶ Stronger post renovation grass establishment

**SISGRASS HYBRID PITCHES ARE APPROVED  
BY ECB FOR DOMESTIC ONE DAY FORMATS**

**SISGrass** cricket pitches are natural grass surfaces, supported with two-tone polyethylene fibres, inserted into the surface at 2cm x 2cm spacings.

**SISGrass** installations are the fastest on the market some of our projects have been completed in just 5 hours!

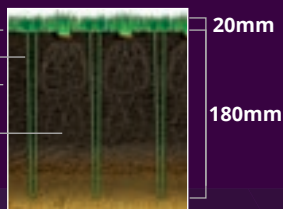

Over 190,000 individual **SISGrass** Fibres are inserted into each surface, to support the natural grass.

Our SISGrass product range is versatile, so whether you have existing and established pitches, or are looking at a new construction, we can help you with your surfaces.

Stitching into existing pitches can help to revive old, slow and poor performing pitches, eliminating the need for reconstruction.

### **SISGRASS**
